4. Course general Description	
<p>This course introduces the students the phonetic alphabets or IPA system. This course aims at training students to distinguish between correct and incorrect pronunciation of the English sounds, before proceeding to develop their pronunciation skills. In addition to a revision of the organs of speech, the course deals with vowel classification (tongue height, tongue part, lip shape and length). There will be vowel oral practice and phonemic transcription of words. Together with the theoretical presentation of speech production mechanism and basic phonetic terminology, students will get extensive training on the practical side of pronunciation and phonetic transcription (namely the International Phonetic Alphabet) throughout the course.</p>
