4. Course general Description: Applied linguistics (AL) is an interdisciplinary field of linguistics that deals with all aspects of linguistic theory that can be put into practice to bridge the gap between linguistic theory and practical fields. To start with, the course gives a brief survey of the definition, history and areas of Applied Linguistics, most of which are detailed in other courses. [For example, Technology and language learning (ENG 6353), Psycholinguistics (ENG 6391), Sociolinguistics (ENG 6392), Discourse Analysis & Forensic Linguistics (ENG 6457) and Preparation for English Tests (6449)] In accordance with Bisha University mission to provide applied education that is relevant to the needs of the local and countrywide communities, AL course is mainly designed to provide the students with an opportunity to develop understanding of and to reflect on both theoretical and practical considerations in the field of second language (L2) learning and teaching. The course covers three major topics in L2: 1- learner and learning; 2- teacher and teaching; and 3- tests and testing. 1-The part on the learning process includes theories of learning in general and theories of second language acquisition in particular. Knowledge about the learner deals with concepts such as the role played by the learner in the learning process and personality factors that affect L2 learning. 2- The part on the teaching process introduces the students to basic concepts in language teaching like “language teaching method”, “Principles and activities of language teaching”, “inductive and deductive language teaching”...etc. Most of the time devoted to this part, however, is spent on introducing language teaching methods like T Grammar Translation Method, Direct Method, Audio-Lingual Method, Silent Way...etc. 3- In testing, the students learn the different types of tests and the difference between tests and testing. They also study the characteristics of a good test and learn how to evaluate the proficiency of language learners in various language skills/areas.	
5. Pre-requirements for this course (if any): Introduction to Linguistics (ENG 6251)	

6. Co- requirements for this course (if any): **None**

7. Course Main Objective(s)

By the end of the course, learners will be able to:

- 1- Show their knowledge about the definition and areas of applied linguistics.
- 2- Explain and discuss the different theories of learning and the related technical concepts and terms.
- 3- Explain and discuss the different theories of L2 acquisition and the related technical concepts and terms.
- 4- Recognize the personality factors affecting language learning.
- 5- Describe the different language teaching methods and the related technical concepts and terms.
- 6- Compare and contrast the different language teaching methods.
- 7- Recognize different types of tests and different types of testing and the related technical concepts and terms.
- 8- Compare different types of tests and different types of testing.
- 9- Determine the reliability and validity of the tests.
- 10- Use language testing for various language skills/areas.
